

Newcomer Strategic Beta ETF of 2022
ASYMshares ASYMmetric S&P 500 ETF (NYSE: ASPY)

*ASPY was also nominated for Newcomer Alternative ETF of the Year
and ASYMmetric ETFs was nominated for Best DEI Initiative of the Year*

June 24, 2022 -- NEW YORK – [ASYMmetric S&P 500 ETF \(ASPY\)](#) was awarded Newcomer Strategic Beta ETF of the Year at the 2022 With Intelligence Mutual Fund and ETF Industry Awards. ASPY was also nominated for Newcomer Alternative ETF of the Year and [ASYMmetric ETFs™](#) was nominated for Best DEI Initiative of the Year.

ASYMmetric ETFs came to market with a vision to revolutionize the way Main Street invests, by introducing powerful new investment tools that seek to deliver ASYMmetric returns.

ASYMmetric returns seek to offer protection against bear market losses, while pursuing equity returns over a market cycle. ASYMmetric ETFs seek to deliver an uncorrelated path to alpha generation, the potential of greater than equity market returns with less risk over a full market cycle, the evolution of equity investing.

“It takes a lot of education to introduce a new approach to equity investing. Winning Newcomer Strategic Beta ETF of the Year should help raise ASPY’s profile and awareness of ASYMmetric returns,” notes Darren Schuringa, CEO of ASYMmetric ETFs. “Investors are facing incredible challenges today: increasing market and economic uncertainty, high inflation, rising interest rates, and spiking correlations between stocks and bonds. ASYMmetric returns address these challenges and ASPY has delivered ASYMmetric returns since going live. Uncorrelated ASYMmetric returns can be powerful diversification tools that seek to lower the risk and improve portfolio performance.”

Award Selection Criteria: The ETF performance awards were judged based on 2021 performance and flows. For the newcomer categories funds must be at least \$25m in AUM, for the other categories funds must be at least \$50m. Newcomer funds must have launched in 2021.

About ASYMmetric ETFs™, LLC

ASYMmetric ETFs, LLC is an investment adviser seeking to transform the way Main Street invests by seeking to provide access to ASYMmetric returns. ASYMmetric returns seek to offer protection against bear market losses, while pursuing equity returns over a market cycle, an

uncorrelated path to alpha generation. ASYMmetric ETFs aim to revolutionize equity investing. **Before investing, carefully consider the fund's investment objectives, risks, charges and expenses. This and other information are in the prospectus and a summary prospectus, copies of which may be obtained on asymshares.com. Read the prospectus carefully before investing.**

Important Risk Information

All investing involves risk, including possible loss of principal. The performance of the Fund will depend on the difference in the rates of return between its long positions and short positions. During a rising market, when most equity securities and long-only equity ETFs are increasing in value, the Fund's short positions will likely cause the Fund to underperform the overall U.S. equity market. When the Fund shorts securities, including securities of another investment company, it borrows shares of that security or investment company, which it then sells. There is no guarantee the Fund will be able to borrow the shares it seeks to short in order to achieve its investment objective. The Fund's investments are designed to respond to volatility based on a proprietary model developed by the Index Provider which may not be able to accurately predict the future volatility of the S&P 500[®] Index. If the S&P 500[®] Index is rapidly rising during periods when the Index Provider's volatility model has predicted significant volatility, the Fund may be underexposed to the S&P 500[®] Index due to its short position and the Fund would not be expected to gain the full benefit of the rise in the S&P 500[®] Index. Additionally, in periods of rapidly changing volatility, the Fund may not be appropriately hedged or may not respond as expected to current volatility. The Fund is not actively managed and the Adviser would not sell a security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Index.

Definitions:

Alpha is the excess return on an investment relative to the return on a benchmark index.
